

GATES TRIPOD

Flexible, Stable and Compact Underwater Platform

The hallmark of any professional underwater sequence is camera stability. With the Gates Tripod shaky shots are now history.

Featuring widely spaced and fully articulating legs, the Gates Tripod provides a stable platform for any Gates housing. Each leg is extensible from 7 to 18 inches for flexibility in rough rocky to flat sandy bottom terrain. Point each front leg forward and the Gates Tripod adds stability for tricky wall subjects, too.

The Gates Tripod is also designed for compactness when not in use. Each leg quickly and neatly folds up underneath the housing around the integrated Green Force battery mounts. No more cradling a big bulky tripod dangling from your housing.

Construction is 100% stainless steel and anodized aluminum, so you know it will withstand even the toughest use, 24 hours a day, 365 days a year, and backed by Gates 2 year warranty.

Specifications

- * **Dimensions**
 - * 8in W x 12in L x 2" H (collapsed)
 - * 20cm W x 31cm L x 5cm H
- * **Legs**
 - * Fully articulating.
 - * Extensible 7 to 18in (18 to 46cm)
- * **Warranty**
 - * 2 Years.
- * **Construction**
