

## nanoFlash Mount

### Integrate the nanoFlash Recorder in your Gates Housing

The **nanoFlash Mount** secures the Convergent Design nanoFlash recorder conveniently inside Gates EX1 / EX1R housings.

The nanoFlash recorder allows very high data rate recording – greater than 100Mbps – with your EX1 / EX1R cameras. Combined with a Gates housing and SWP44C Super Wide Port, it represents the smallest underwater video system capable of meeting the highest standards for broadcast HD acquisition.

The nanoFlash Mount is complete with Gates legendary customer support. The pros know there is no need to take a chance... they take a *Gates!* (Camera, batteries and nanoFlash recorder not included.)

### Key Features

**Close integration** of the nanoFlash recorder inside the Gates EX1 and EX1R housings.

**Broadcast HD acquisition** standards are achieved with the Gates EX1 / EX1R housing, nanoFlash recorder and SWP44C port.

### Specifications

**\* Standard Components**

- \* nanoFlash Mount bracket
- \* SDI Cable                      \* Hardware

**\* Optional Components**

- \* SWIT battery S-8U62 battery Adapter Cable

**\* Dimensions**

- \* N/A. Integrates closely with the Gates EX1/EX1R housing / camera systems

**\* Weight**

- \* <1lb / 0.45 kg

**\* Warranty**

- \* 2 years

### Special Considerations

**\* Status Display**

- \* When using the nanoFlash, status information is available only via the rear housing viewfinder. Status display from the camera must be 'OFF' for SDI and component video feeds.

**\* Power Options**

- \* Power to the nanoFlash recorder can be either
  - Li-Ion battery (from Convergent Design) or
  - SWIT S-8U62 battery, which can power both the camera and nanoFlash.

**Don't Take a Chance....Take a *Gates!***
